

Chemistry of Cement

**Proceedings of the
Fourth International Symposium
Washington 1960**

U.S. Department of Commerce
National Bureau of Standards
Monograph 43 — Volume I

UNITED STATES DEPARTMENT OF COMMERCE • Luther H. Hodges, *Secretary*

NATIONAL BUREAU OF STANDARDS • A. V. Astin, *Director*

Chemistry of Cement

Proceedings of the Fourth International Symposium Washington 1960

Volume I

Symposium held October 2-7, 1960 at the
National Bureau of Standards
Washington 25, D.C.

Proceedings published in two volumes *

National Bureau of Standards Monograph 43—Volume I

Issued August 31, 1962

For sale by the Superintendent of Documents, U.S. Government Printing Office, Washington 25, D.C.

* Prices: Volume I \$5.75, Volume II \$5.50. The two volumes at \$11.25 a set.

Contents

Volume I

Preface	ii	Discussion	
List of Symposium members and authors	iv	Guenter Ahlers	128
Explanatory notes	x	Author's closure	129
Session I. General Addresses			
Paper I-1. Some problems associated with the growth of science.		Paper II-S9. Note on the behavior of tetracalcium aluminoferrite in an atmosphere of hydrogen.	
Wallace R. Brode	1	P. Longuet	131
Paper I-2. Cement research: Retrospect and prospect.	5	Session III. Chemistry of Hydration of Cement Compounds	
F. M. Lea		Paper III-1. The hydration of tricalcium silicate and β -dicalcium silicate at room temperature.	
Session II. Chemistry of Clinker			
Paper II-1. Phase equilibria and constitution of portland cement clinker.		Stephen Brunauer and S. A. Greenberg	135
R. W. Nurse	9	Paper III-2. Hydrothermal reactions in the system $\text{CaO}-\text{SiO}_2-\text{H}_2\text{O}$ and the steam curing of cement and cement-silica products.	
Discussion		H. F. W. Taylor	167
N. Yannaquis and A. Guinier	21	Discussion	
A. J. Majumdar and Deane K. Smith	23	Gunnar O. Assarsson	190
N. Yannaquis and A. Guinier	26	H. Grothe, G. Schimmel, and H. zur Strassen	194
Myron A. Swayze	26	D. M. Roy and R. I. Harker	196
H.-G. Smolczyk	27	G. C. A. Schuit and R. Wyatt	201
Levi S. Brown	29	Author's closure	202
Rustum Roy	29	Paper III-3. Hydration of calcium aluminates and ferrites.	
H. Krämer and H. zur Strassen	32	F. E. Jones	204
Katharine Mather	34	Discussion	
Author's closure	35	H. zur Strassen and C. H. Schmitt	243
Paper II-2. Crystal structures of clinker constituents.		C. H. Schmitt	244
Fred Ordway	39	H. zur Strassen	244
Paper II-S1. The effect of minor components on the hydraulicity of the calcium silicates.		M. H. Roberts (closure)	245
J. H. Welch and W. Gutt	59	Paper III-S1. The heat of formation of calcium trisulfatoaluminate at 25° C.	
Discussion		H. A. Berman and E. S. Newmann	247
C. A. White	67	Paper III-S2. The composition of ettringite in set portland cement.	
Author's closure	68	H. G. Midgley and D. Rosaman	259
Paper II-S2. X-ray diffraction examination of portland cement clinker.		Paper III-S3. The temperature coefficient of the rate of hydration of β -dicalcium silicate.	
H. G. Midgley, D. Rosaman, and K. E. Fletcher	69	John H. Taplin	263
Discussion		Paper III-S4. Hydraulic properties and hydration of glasses of the system $\text{CaO}-\text{Al}_2\text{O}_3-\text{SiO}_2$.	
D. L. Kantro, L. E. Copeland, and Stephen Brunauer	75	F. W. Locher	267
H.-G. Smolczyk	80	Discussion	
Paper II-S3. Influence of reducing atmosphere on the constitution of clinker.		H.-G. Smolczyk	275
Y. Suzukiwa and T. Sasaki	83	Author's closure	275
Paper II-S4. Reactions of coal ash with portland cement clinker during the burning process.		Paper III-S5. The precipitation of $\text{CaO}\cdot\text{Al}_2\text{O}_3\cdot10\text{H}_2\text{O}$ from supersaturated calcium aluminate solutions at 21° C.	
T. Heilmann	87	A. Percival, F. G. Buttler, and H. F. W. Taylor	277
Paper II-S5. Solid solution of alumina and magnesia in tricalcium silicate.		Paper III-S6. Steam curing of cement and cement-quartz pastes.	
F. W. Locher	99	A. Aitken and H. F. W. Taylor	285
Discussion		Paper III-S7. Two different ways of hydration in the reaction of $\beta\text{-Ca}_2\text{SiO}_4$ with water at 25° C-120° C.	
Guenter Ahlers	104	Herbert Funk	291
E. Woermann	104	Paper III-S8. Infrared absorption spectra of some compounds in the $\text{CaO}-\text{SiO}_2-\text{H}_2\text{O}$ system.	
Author's closure	106	Charles M. Hunt	297
Paper II-S6. Reaction velocity in portland cement clinker formation.		Discussion	
Renichi Kondo	107	Rustum Roy	304
Paper II-S7. Solid solutions of the minerals of portland cement clinkers.		Author's closure	305
N. A. Toropov	113		
Discussion			
Myron A. Swayze	118		
Paper II-S8. The decomposition of alite in technical portland cement clinker.			
E. Woermann	119		

	Page
Paper III-S9. Crystalline solubility and zeolitic behavior in garnet phases in the system CaO-Al ₂ O ₃ -SiO ₂ -H ₂ O. Della M. Roy and Rustum Roy	307
Paper III-S10. Calcium exchange in systems of xCaO-SiO ₂ -yH ₂ O-Ca(OH) ₂ -H ₂ O. T. Thorvaldson, F. W. Birss, and K. G. McCurdy	315
Paper III-S11. Kinetics of reaction in the system CaO-SiO ₂ -H ₂ O. P. E. Halstead and C. D. Lawrence	321
Discussion Sidney A. Greenberg	325
Paper III-S12. The influence of high pressure steam on the process of hardening of calcium and magnesium silicates and of cements of different compositions. P. I. Bozhenov, V. I. Kavalerova, V. S. Salnikova, and G. F. Suvorova	327
Paper III-S13. Concerning the hydration products of 3CaO-SiO ₂ and β-2CaO-SiO ₂ . H. G. Kurczyk and H. E. Schwiete	349
Session IV. Chemistry of Hydration of Portland Cement	
Paper IV-1. Early hydration reactions of portland cement. Kenneth T. Greene	359
Discussion W. C. Hansen	374
E. T. Carlson	375
T. C. Powers	376
A. J. Gaskin	377
S. A. Greenberg and V. S. Mehra	378
Author's closure W. C. Hansen	384
Paper IV-2. False set in portland cement. W. C. Hansen	387
Discussion Toshio Manabe	404
Paul Seligmann and N. R. Greening	408
Jean Laneuville	410
Renichi Kondo	411
R. R. Hattiangadi	412
L. Santarelli	414
Guenther Ahlers	415
Myron A. Swayze	416
A. Rio and R. Turriziani	417
A. J. Gaskin and J. K. McGowan	420
Volume II	
Page	
Session V. Properties of Cement Paste and Concrete	
Paper V-1. Physical properties of cement paste. T. C. Powers	577
Discussion H. W. W. Pollitt	609
G. E. Bessey	610
Author's closure Åke Grudemo	611
Paper V-2. The microstructure of hardened cement paste. Åke Grudemo	615
Discussion L. E. Copeland and Edith G. Schulz	648
Levi S. Brown	655
Author's closure Robert G. L'Hermite	656
Paper V-3. Volume changes of concrete. E. Torroja and C. de la Peña	659
Discussion E. Torroja and C. de la Peña	695
Page	
Author's closure	424
Paper IV-3. Chemistry of hydration of portland cement. L. E. Copeland, D. L. Kantro, and George Verbeck	429
Discussion J. H. Taplin	465
H.-G. Smolczyk	467
Paper IV-S1. The role of gypsum in the hardening of hydraulic cements. P. P. Budnikov	469
Paper IV-S2. The mineralogical examination of set portland cement. H. G. Midgley	479
Discussion H. Dutz	490
Paper IV-S3. Nuclear magnetic resonance study on hardened cement paste. K. Watanabe and T. Sasaki	491
Paper IV-S4. The rate of hydration of cement compounds and portland cement estimated by X-ray diffraction analysis. G. Yamaguchi, K. Takemoto, H. Uchikawa, and S. Takagi	495
Paper IV-S5. Proton magnetic resonance in hydrated portland cements. R. L. Blaine	501
Paper IV-S6. Infrared spectroscopy studies on the hydration of clinker minerals and cements. H. Lehmann and H. Dutz	513
Paper IV-S7. Heat of hydration of cement as affected by water-cement ratio. Ulf Danielsson	519
Discussion W. C. Hansen	526
Paper IV-S8. The influence of false setting on some properties of hardening cement paste and mortar. Jerzy P. Sulikowski	527
Paper IV-S9. Thermodynamics of the hardening processes of cement. O. P. Mcchedlov-Petrosyan and W. I. Babushkin	533
Paper IV-S10. Contribution to the determination of the heat of hydration of clinker minerals. H. E. Schwiete and A. Tan Tik-Ien	545
Author index for volumes I and II	551
Subject index for volumes I and II	561
Publications program of the NBS	573
