Volume II

SPECI	FIC THEME I-A : Clinker Formation Including New Processes		
1. 107	Relationship Between Zonal Structure in Alite, Lamellar Texture in Belite and their Production Process, Composition and Crystal Structure Hiroshi Uchikawa, Shunsuke Hanehara and Tokuhiko Shirasaka	Fermilar N S S	3
2.	Phase Composition Formation of Portland Cement Clinker and Alite Formation Kinetics B S Albats, Yu R Krivoborodov and V P Ryazin	Orinosiliga Renotivity Ion Te	10
3.	Crystal Structure Analysis of Major Constituent Phases in Ordinary Portland Cement Masaki Daimon, Yoshinobu Hirano, Takaaki Tsurumi and Kiyoshi Asaga	Effect of the Phases / G Lu	17
8 ⁴ .	Growth of Hydraulic Activity of Portland Cement Clinker as a Result of Using of Precalcining B Weryński and L Janecka	Developme S Laxi	23
	of the Combustion of Coal Mixed with Lunestone on the Burning Process		
5.	Negative Effect of Alkali on Burning and Properties of Portland Cement Clinker and . its Improving Measures Shan-ba Wang and Yuankui Chen	of Clink or Wang	29
	simal Treatment on the Reactivity of Clinker Minerals Producted from Vertical		
6.	Research on Forming Mechanism of Portland Cement Clinker under Different Burning . Conditions Ji Shang Xing and Xu Fengjuan	Shan Kimoo	36
7.	Optimal Parameters of Clinker Formation in a Rotary Kiln G B Yegorov, I E Alexandrov and A M Turetski	ICY Ely.	43
8.	The Decomposition of Alite in Portland Cement Clinker Shunni Liu and Zongshou Lin	Morphology	49
9.	Role of Clinker Liquid in Promoting the Clinkerisation and its Impact on Clinker . Morphology and Microstructure S C Ahluwalia, R K Goswami and T V Kouznetsova	ne study a Consumptio Z G Qi	56
10.	Acceleration of the Clinker Formation Process <i>P F Rumyantsev and N T Erofeeva</i>	Machanogot I. M. Su	62
11.	Trace Element Balances in Kiln System of a Few Indian Cement Plants N A Krishnan, V K Gore, S A Khadilkar, R V Hargave, C H Page and A K Chatterjee		67
12.	Phase Transformations when Synthesizing Clinkers Produced of Technogeneous . Raw Materials	ngy (g. ypus 1 G. ypus 1	74
	I S Akhmetov and O A Miryuk		
13. 183	Studies on Rapid Burning Temperature, Time and Raw Meal Modulus Range in . Portland Cement	Shrellos of the	81

14.	The Structure and Properties of Low-CaO Contained Clinker T V Kouznetsova, A P Osokin, V G Akimov and V N Panyuskin			88
15.	Research on the Chemical Composition and Microstructures of Sulpho-Aluminate Cement Clinker Su Muzhen, Deng Junan, Wu Zongdao and Liu Xiaoxin	BMB	нт опп	94
	And a second			
16.	Formation and Solid State Properties of β-Dicalcium Silicate N B Singh, S P Singh and A K Shukla	ction liroshi	Perdu A	101
17.	Orthosilicate Compositions in CaO-SrO-BaO-SiO ₂ System and Their Water Reactivity	0.000 200	Phuse Kinetic	107
	Ion Teoreanu and Ecaterina Andronescu			
18.	Effect of Increased Magnesium Oxide Contents and Mixture Basicity Upon Clinker Phases	il Shu	Crysta	114
	I G Luginina, A I Boykova and O I Fomichova			
19.	Development of Alumino-Belitic Coloured Clinkers S Laxmi, Lata Mohan, P S Sharma and A K Dhawan	h at i cining Werv	Growti Prečal B	118
20.	The Effect of the Combustion of Coal Mixed with Limestone on the Burning Process			125
	of Clinker Wang Yuping, Huang Wenxi, Jiang Youxing and Ye Qiaoming			
21.	Effect of Thermal Treatment on the Reactivity of Clinker Minerals Produced from Vertical Shaft Klin			132
	K Raina and R Bhargava			
22.	A Study on Improving Heat Transfer Between Gas and Solid in Suspended State — A New Material Sealing and Dispersion Device Xia Youming, Cheng Jingxiang and Huang Wenxi	Shan I Para B Yar	u Optima G	139
23.	Morphology and Microstructure Features of Clinker from Vertical Shaft Kiln S C Ahluwalia and K Raina	gricos Linno	The D:	146
24.	The Study and Application on High-Quality Cement Clinker Calcining with Low Heat Consumption in Shaft Kiln <i>Z G Qin</i>	i (***) iogy ami	Raieroi Morpho	153
05	Neckensetistics of Parland Consett Day Misso			100
25. Sõ	L M Sulimenko	nons nuPi P	Acceler P	160
26.	The Study on the Formation of Portland Cement Clinker in Low-Temperature and a Rapid Heating-up Burning Process	lonie)	Traco E	164
	Huang Wenxi, Lu Zhongyuan and Xu Guangliang			
27.	Development of Radiation-Thermal Technology of Cement Manufacture I G Abramson, A F Vaisman, R M Kapralova and N G Fadeyeva	Transi	Phase Paul M	171 S7
28.	Evaluation of Radiation Synthesized Clinker S K Handoo, George Samual, R K Goswami, I G Abramson and Yu V Nikiforov	ndulA	5.1	177
29.	Kinetics of the Radiation-Thermal C ₂ S Synthesis G B Yegorov, B K Kanimov and G V Shkatova	n no chiO i chiO i	Studies Portiand Hu	183

VIII

30.	Clinkerisation Through Melting — A New Approach S A Khadilkar, P G Lele, C H Page and A K Chatterjee	190
31.	Peculiarities of the Process of Cement Clinker Formation by Changing the Interaction Sequence of Reacting Components V D Barbanyagre, V M Shamshurov and T I Timoshenko	196
32.	Low Temperature Reducing-Oxidative Technology for Portland Cement Production P P Lerke	201
33.	Physical and Chemical Peculiarities of a New Low-Energy-Consuming Technology for Portland Cement Production P P Lerke	205
34.	Thermal Treatment of Cement Raw Materials Through Intensive Heat Exchange A B Ryzhik, M V Kougiya and A V Alexandrov	210
	Role of Mineralizers in Aille Formation in a Rice Husk ASH, CaCO, Naw Mix	48 '
SPEC	IFIC THEME I-B : Effect of Low Grade Fuels, Combustible Wastes and Non-traditional Raw Materials	
	Quarity Improvement in Crimical Using Michelausers/Activators	
35.	The Reduction of Dioxin in Connection with the Use of Waste-Derived Fuels in the	217
	Richard Bolwerk	
36.	Effects of Using Rice Husk and its Ash as Fuel and Raw Material Component Respectively in Cement Manufacture	224
	S P Ghosh, K Mohan and R K Gandhi	
37.	Complete Substitution of Natural Raw Materials by Shale Industry Waste at Cement Plant Reconstruction A K loganson, M V Kougiya and L S Fraiman	232
	Yang Yurong, Huang Wenxi, Cian Guangrein and Gr. Faligheilig: Balanekool: M. Boosher	
38.	Conservation of Raw Material Through Use of Industrial Wastes in Cement Manufacture V K Gore, S A Khadilkar, P G Lele, C H Page and A K Chatterjee	238
39.	Safety and Ecological Problems in Burning Energy-Saving Raw Materials A B Ryzhik, A K loganson, L S Fraiman and A V Alexandrov	245
40.	Studies of Belite Cement From Barium Containing By-product	250
	K Rajczyk and W Nocuñ-Wczelik	
	Containing 4% SOs	055
41.	Formation of C ₃ S in the Mixtures Containing Different Silicate Raw Materials	255
40	Influence of F on Crystallina Structure of C ₃ 5	33
42.	New Data on Raw Mixes Burning in Dry-Process Klins on the Basis of an Artificial Clayish	261
	A I Zdorov and V L Bershtein	
12	An Impact of Non-traditional Daw Matarials on the Formation and Dranatics of	OCE
43.	Clinker	202
	M A Akhmedov, A A Mukhamedbaev, M T Artykbaev, Z S Salimov and A P Fiodorov	

44.	Studies on Producing Portland Cement with Tailings of Molybdenum-Iron Ore Pan Yi Zhou	Isishek X & C	101 (O	271
45.	Experiences in Use of Industrial By-product Sludge for Cement Manufacture by SOL-Gel Technology	aliani. Venca	Seq:	278
	V Varadarajan, C H Thombare, S A Borkar, C H Page and A K Chatterjee			
SPECI	FIC THEME I-C : Effect of the Use of Mineralisers, Modifiers and Activators			
46.	Thermal Behaviour of Mineralized Portland Cement Raw Meal F Ayed, R Castanet and F P Sorrentino	arcal-a) iand C	Port Port	287
47.	Sintering Mechanism of Portland Cement Clinker with Energy-Saving and			294
	Early-Strength Wang Xinrong, Zhu Jiaoqun, Xian Yafang and Wang Shanba			
48.	Role of Mineralizers in Alite Formation in a Rice Husk Ash - CaCO ₃ Raw Mix K C Misra and P C Borthakur			301
	Non-traditional-Ray Materials			
49.	Quality Improvement in Clinker Using Mineralisers/Activators		••••	308
	A K Parashar, V K Malhur, Shiee Gopar and S K Handoo	Redu		
50.	Formation of Low Temperature Portland Cement Clinker by Using Non-traditional Aluminosilicate Rock and Mineralizer	Aichte Richte		315
	Sanjaasuren Radnaasediin			
51.	Effect of SO₃ on Mineral Formation and Properties of Clinkers Su Dagen, Chen Weiqing, Huang Qixiu, Mai Huo and Zheng Liqiang	pective S PHC	Bes	322
52.	The Influence of SO ₃ in $C_2A_xF_1x-C_{11}A_7CaF_2-C_2S$ System on Formation of $C_{11}A_7CaF_2$	nplete it Reck	Con	329
	Yang Yurong, Huang Wenxi, Qian Guangren and Qi Yangyong			
53.	Effect of Sulphate on the Reaction of C₃S Formation H M Cheong, S H Choi, K S Han and J D Jaung	servali V K C	Con	335
54.	Effect of Fluorite-Gypsum Composite Mineralizer on the Microstructure and Properties of Portland Cement Clinker Phase	ity and A B A	Safe	342
	Ye Qing, Kong Jianmin and Liu Baoyuan			
55.	Evaluation of an Optimum Percentage Addition of Fluorspar in White Cement Raw Mix	K Rak		351
	Containing 4% SO₃ <i>H U Shah and Zafar Iqbal</i>			
56.	Influence of F on Crystalline Structure of C₃S	•••		358
	Shanba Wang and Zhonghui Zhow			
57.	Effect of Fluorine-Bearing Limestone on Clinker Quality G Goswami, B N Mohapatra and J D Panda	A I Ze		365
58.	The Effect of ZnO on Burning of Portland Cement Clinker in Rapid Heating-Up Burning	192 N A M	Clipi	372
	Xu Guangliang, Huang Wenxi, Lu Zhongyuan and Qian Guangren			

X (1)

59.	The Effect of Calcium Fluorosulpho-Silicate on Formation of Calcium Silicate Huang Wenxi, Xu Guangliang and Lu Zhongyuan	••••		379
60.	The Effect of the Composite Mineralizers of CaF ₂ , CaSO ₄ and ZnO on the Formation of the Portland Cement Clinker in a Rapid Heating-Up Burning <i>Lu Zhongyuan, Huang Wenxi and Xu Guangliang</i>	••••	•••	386
61.	Research and Application of Composite Mineralizer in Rotary Kiln Li Peiquan, Liu Changfa, Su Muzhen, Lu Baoshan, Li Guangmin, Ge Wenmin and Chen Yongfan		•••	393
62.	Active Belite Cement Ingo Mielke, Anette Müller and Jochen Stark	 hen	19 I-	399
63.	Lithium as Intensifier in the Formation of Dicalcium Silicate Phase V K Mathur, R S Gupta and S C Ahluwalia			406
64.	Effect of SO₃ and MgO on Phase Relations and Crystal Chemical State of Phases in Belite-Aluminoferrite Clinkers A I Boikova, O I Fomicheva and L V Grishchenko	 onn	' stic	413
65.	Role of Manganese on the Kinetics of Formation and Hydration of C ₃ S Phase Ram Prakash, S C Ahluwalia, N K Katyal and V K Mathur	000	 	420
66.	Burning Cement Clinker from the Raw Meal Using Barite and Fluorspar as a Combined Additive Xu Xianyu, Yang Liqun and Chen Jian	•••	•••	427
67.	Application Feasibility of a Calcination Catalyst in Cement Manufacture — A Case Study <i>S A Khadilkar, P G Lele, C H Page and A K Chatterjee</i>		•••	434
68.	Activators for Accelerated Calcination S Laxmi, A K Ailawadi and M M Ali			440

Volume III

THE	ME II A: Advances in Portland and Blended Cements	
1.	Gypsum-free High Early-strength Cement	3
2.	The Research on C ₂ A _x F _{1-x} in Iron-rich Fluoraluminate Cement	9
3.	Strength Development and Heat of Hydration of Low Heat Cement	16
4.	Properties of Special Cement Adjusted Particle Size Distribution	23
5.	The Sub-cluster Model of Cement Particle Size Distribution	30
6	Production Performances and Utilization of a Special Superplasticized Cement	38
7.	White Belitic Portland Cements	45
8.	The Mechanochemical Activation of Belite Luhui Zhong Jinyu, Fan Yueming and Yang Jiazhi	51
9.	Characteristics of Masonry Cement Produced at 975° C in Fluidized Bed Boiler	58
10.	Ion Exchange Reaction of Granulated Blast Furnace Slag in Acid Solution	65
11.	Suitability of Rice Husk Ash Obtained by Fluidized-bed Combustion for Blended Cement	72
12.	Reactivity Test for Fine Silicas and Pozzolanic Mineral Additives	79
13.	Activity and Properties of Pozzolan Used in Blended Cements	86
14.	The "Capacity of Exchange" of Pozzolanic Additions: Its Origin and Influence in the Fratini Test	93
	Rafael Talero	
15.	Some Studies on the Activation of Blastfurnace Slag in Cements without Clinker	101
16.	Properties of Very Fine Blastfurnace Slags Manufactured by Jet Mill P J Nieminen and K P K Pylkkänen	108

17.	Chemical Activating of Metallurgical Slag in the Conditions of Granulating V V Vulkov, N A Delchev and N S Nikonova		. 115
18.	Metallurgical Slags as Blending Materials for Cement Manufacture K M Sharma, R Bhargava, D Yadav and S C Ahluwalia	· · · · < ;	. 121
19.	Effect of Structure and Composition on Reactivity of Zeolite-tuff used as Blending Material of Portland Cement		. 128
	ances in Poniand and Blended Caments		
20.	A Study on the Morphology and Microstructure of Activated Indian Fly ash R N Sharma, S N Ghosh, V K Mathur and A K Solankey	Gypsum-t V V Ch	. 135
21.	Binder Enhanced Refused Derived Fuel Ash: A Study of Hydrolysis. Russell Hill and Kenneth E Daugherty	The Res e	. 142
22.	New Technique for Economical Manufacture of Cement Based Binders R Karvinen and P Nieminen	Strength C	. 149
23.	Blended Cements Containing Granulated Slags from Ferrochrome Production T V Kuznetsova, V V Mityushin, N S Nikonova and V H Jabirov	Properties Kiyohik	. 154
24.	Study on Effects of Kiln Dust Addition to Portland and Blended Cements S P Ghosh, P Padmanathan and K Mohan	"The Sub-c Feng X	. 159
25.	Influence of Degree of Hydration of Slag on Slag Cements A F Battagin	Production	. 166
26.	SO ₃ Content of Portland and Blended Cements: Porosity and Behaviour of the Resultant Mortars <i>R Sersale, R Cioffi, G Frigione and F Zenone</i>	White Beli Marcele	. 173
27.	Limestone Additions to Portland Cement: Uptake, Chemistry and Effects Kevin D Ingram and Kenneth E Daugherty	The Mach Lunul 2	. 180
28.	Effect of Pozzolana Additions on Hydration and Performance of Portland Slag Cement K M Sharma, R N Sharma, D Yadav and K C Narang	Characteri Fu Zich	. 187
THE	IE II B: Developments in New-portland Cements		
29.	Synthesis and Properties of Low Energy Cements Based on C ₄ A ₃ S J Beretka, L Santoro, N Sherman and G L Valenti	Suitability N Hara	. 195
30.	The Crystal Structure of C ₄ A ₃ S Zhang Peixing, Chen Yimin, Shi Liping, Zhang Guanying, <i>Huang Wenmei and Wu Jianguo</i>	Reactivity C Verni	201
31.	Sulfate-bearing Solid Solution of Calcium Aluminates and Ferrites Yu R Krivoborodov and S V Samchenko	Activity an C Unut	209
32.	Mechanisms at the Mixed Sulphataluminates Formation in the CaO-Al ₂ O ₃ -(Sr, Ba) SO ₄ Systems I Teoreanu, A Puri and M Georgescu	The "Caps in the Frat Rafael	216
33.	Cements Based on Modified Portland and Sulfoaluminate - Belite Clinkers S I Ivashchenko	Some Stur C E S 7	222
	of Very Fine Blastfurnace Stags Manufactured by Jot Mill		16.

34.	Potentials of Using Dolomitic Limestone in Making Sulphoaluminate - Silicate Cements M M Ali, P S Sharma and R Bhargava	Dryld Ma	'	227
35.	Examination of 12CaO.7Al ₂ O ₃ Phase Doped with Magnesium, Iron and Titanium Oxides Z Konik, A Stock and J Iwanciw	Hand Kanet		233
36.	Ca ₂ AlMnO ₅ : Studies about its Characterization and Hydration and Employed account and the second state of the second state			239
37.	Barium Aluminate Cement — Its Synthesis and Formation Kinetics S J Raina, S Agarwal, M M Ali and S K Agarwal	A		245
38.	Mechanisms at the Formation of some Unitary Strontium and Bariumsuphataluminats I Teoreanu, M Georgescu, A Puri and A Badanoiu	ne.		250
30	Sulfoferrite Coments			256
0.0.	A P Osokin, Yu R Krivoborodov and N F Dyukova	Td a	an	
40.	Kinetics of Aluminoferrite Formation at Different Conditions Chen Yimin, Shi Liping, Su Muzhen and Deng Jun'an	inte U	1	262
41	Study on Cement in the C. A. CaF -C.S.System			268
-11.	Liu Kezhong, Deng Zhongyan, Yuan Mingdong and Tang Jinshu	M.	•••	200
42.	New Energy-saving Cement — Iron-rich Fluoraluminate Cement and Manuel 2 prime Huang Wenxi, Qian Guangren, Yang Yurong and Qi Yanyong	erIT . H	•••	277
43.	Hydraulic Binders Based on Condensed Silica Fume and Slaked Lime Condensed Silica Fume and Slaked Silica Fume	nuM. R	•••	284
44.	High Strength Alkali Steel-Iron Slag Binder And Binder AV9 normal actioned actioned action and Bian Qinghan, Wu Xuequan and Tang Mingshu	Cher		291
45.	Comparison of the Microstructure and Performance of Alkali-slag and	C.		298
	Caijun Shi, Robert L Day, Xuequan Wu and Mingshu Tang Anna appendix and America			
46.	The Selection of Stimulation Agents for Alkali-slag Cement and a second memory to promise Chen Zhi Yuan and Liao Xin	Den C		305
47.	Alkali Activated Slag Cementitious Material for Drilling Operation Construction States and S W Brylicki, J Malolepszy and S Stryczek	ertti.J . T	•••	312
48.	The Research of the Reactive Products and Mineral Phase for Vendor Mineral Phase for Vendor Mineral FKJ Cementitious Material Lu Changgao	solic S	•••	319
432	sum-free Rapid Hardening and Mixed Portland Cement, 199			
49.	Investigation of the Possibility of Making Hydraulic Binder by Chemical Activation of Domestic Ash and Mixture of Slag and Domestic Ash N Kostić and B Skenderović	M.		325
	P Kholoshin and S V Vavrenyuk			
50.	Evaluation of Physio-chemical and Hydration Characteristics of Supersulphated Cement K Mohan and S P Ghosh			331
51.	Phosphate-bonded Dental Cements W Jiang and Nanru Yang	•		338

52.	MgO - Ammonium Polyphosphate Systems 2 protection of the state of the	 345
53.	Hardening Processes for Some Refractory Binding Systems and Considerations and Mechanisms Kinetic Considerations and Mechanisms I Teoreanu and N Angelescu	 351
THE	ME II C: Cementitious Systems Including DSP; CBC etc. of the second state and second a second s	
54. 245	High-strength Hot-pressed Cement Paste A A Pashchenko, V V Chistyakov and Ye A Myasnikova and the mame Set of null A mune 8	 361 \\\\
55. 850	Contact-condensation Binders Based on Calcium Hydrosilicates Raisa F Runova	 367
56. 883	Mechanical and Microstructural Characterization of MDF Cement-SiC Whisker Composites T H Kim, Y W Park and S H Choi	 373
57.	Mechanical Properties of MDF Cement Composites with SiC Powder J H Kim, S H Choi and K S Han	 380
58.	Chemistry and Porosity in Modelled MDF Cement Minerals Milan Dràbik, Miloš Krištofik, Ľubica Gáliková and Sadananda Sahu	 386
59.	The Increasing Strength Mechanism of the Role of Interfacial Bond in MDF Cement	 393
60.	Numerical Simulation of MDF Composite Materials	 400
61.	Chemical Interaction between PVA and Hydrating HAC: Infrared Spectroscopic and Thermoanalytical Investigations <i>S Harsh, Y C Naidu and S N Ghosh</i>	 406
62.	Mechanism of Glass-ionomer Cement Hardening E Sakai, K Ono, K Asaga and M Daimon	 413
63.	Densifying of Cement Pastes by Chemical Deposition of Silica in the Pores C Atzeni, L Massidda and U Sanna	 419
64.	Lithium Salts as Set Accelerators for High Alumina Cement	 425
65.	Solid State Compatibility in the System CaO-SiO ₂ -Al ₂ O ₃ -CaF ₂ -CaSO ₄ - Solid State Compatibility in the System CaO-SiO ₂ -Al ₂ O ₃ -CaF ₂ -CaSO ₄ - Solid State Compatibility in the System CaO-SiO ₂ -Al ₂ O ₃ -CaF ₂ -CaSO ₄ - Solid State Compatibility in the System CaO-SiO ₂ -Al ₂ O ₃ -CaF ₂ -CaSO ₄ - Solid State Compatibility in the System CaO-SiO ₂ -Al ₂ O ₃ -CaF ₂ -CaSO ₄ - Solid State Compatibility in the System CaO-SiO ₂ -Al ₂ O ₃ -CaF ₂ -CaSO ₄ - Solid State Compatibility in the System CaO-SiO ₂ -Al ₂ O ₃ -CaF ₂ -CaSO ₄ - Solid State Compatibility in the System CaO-SiO ₂ -Al ₂ O ₃ -CaF ₂ -CaSO ₄ - Solid State Compatibility in the System CaO-SiO ₂ -Al ₂ O ₃ -CaF ₂ -CaSO ₄ - Solid State Compatibility in the System CaO-SiO ₂ -Al ₂ O ₃ -CaF ₂ -CaSO ₄ - Solid State Compatibility in the System CaO-SiO ₂ -Al ₂ O ₃ -CaF ₂ -CaSO ₄ - Solid State Compatibility in the System CaO-SiO ₂ -Al ₂ O ₃ -CaF ₂ -CaSO ₄ - Solid State Compatibility in the System CaO-SiO ₂ -Al ₂ O ₃ -CaF ₂ -CaSO ₄ - Solid State Compatibility in the System CaO-SiO ₂ -Al ₂ O ₃ -CaF ₂ -CaSO ₄ - Solid State Compatibility in the System CaO-SiO ₂ -Al ₂ O ₃ -CaF ₂ -CaSO ₄ - Solid State Compatibility in the System CaO-SiO ₂ -Al ₂ O ₃ -CaF ₂ -CaSO ₄ - Solid State Compatibility in the System CaO-SiO ₂ - Solid State Compatibility in the System CaO-SiO ₂ - Solid State Compatibility in the System CaO-SiO ₂ - Al ₂ O ₃ -CaF ₂ -CaSO ₄ - Solid State Compatibility in the System CaO-SiO ₂ - Solid State Compatibility in the System CaO-SiO ₂ - Solid State Compatibility in the System CaO-SiO ₂ - Solid State Compatibility in the System CaO-SiO ₂ - Al ₂ O ₃ - CaF ₂ - CaSO ₄ - Solid State Compatibility in the System CaO-SiO ₂ - Solid State Compatibility in the System CaO-SiO ₂ - Solid State Compatibility in the System CaO-SiO ₂ - Solid State Compatibility in the System CaO-SiO ₂ - Solid State Compatibility in the System CaO-SiO ₂ - Solid State Compatibility in the System CaO-SiO ₂ - Solid State Compatibility in the System CaO-SiO ₂	 431
66. 858	Gypsum-free Rapid Hardening and Mixed Portland Cement M A Sanitsky and Ch S Sobol	 438
67.	Resource-Saving Coloured Cement-mineral Compositions E P Kholoshin and S V Vavrenyuk	 444

International Congress on the Chemistry of Cement New Delhi, India, 1992

0810. 7.	Influence of Constituents on the Surface Absorption Characteristics of Concrete	39
8.	Consideration about the Durability of Mortars with Granulated Blast-Furnace Slag as Fine Aggregate A F Battagin and L Scandiuzzi	46
0	Relationship including Modelling and the sector include a sector in the	50
9. Var .	Y Tezuka, D Gomes Jr, J M Martins and J G Djanikian	26.
10.	Influence of Gypsum Content in Portland Cements on Sulphate Resistance	60
11.	Influence of Cement Characteristics on the Protective Value of the Concrete Cover	67
191	Consistion of Concrete Strength with Cement According to Erest Posistance Easters	74
12.	G I Gorchakov and A B Andreyeva	276
13.	Effect of Diatomaceous Earth on Blended - Cement Properties	78
14.	The Influence of Limestone Additions on Rheological Properties and	84
	Vater Retention Value of Portland Cement Slurries Claudio Sbrighi Neto and Vicente C Campitelli	
15.	The Influence of the type of Cement on the Properties and Microstructure	89
	Shondeep L Sarkar and Moussa Baalbaki	4.80

16.	Effects of the Initial Structure of the Cement Paste in Fresh Concrete on the First Developments of Strer, gth. Influence of Superplasticizers <i>C Legrand and E Wirquin</i>		95
17.	The Effect of Curing Conditions on Chloride Diffusivity in Silica Fume High Strength Concrete <i>Tang Luping and Lars-Olof Nilsson</i>	- 10	100 392
18.	Permeability and Diffusion of Gases in Concrete U Costa, M Facoetti and F Massazza		107
19.	Evaluation of Compatible-superplasticizer for the Production of		115
	M Rollet, C Levy and R Cavailles		
20.	Influence of Cement on Thermal Cracking of Concrete at Early Ages R Springenschmid and R Breitenbücher		122
21.	Retarded Expansion for Cooling Shrinkage Compensation in Mass Concrete Wang Yuqing and Lou Zonghan		129
22.	Durability of Concrete with Different Cements and Aggregates Under Sustained Load Wojciech G Piasta		136
23.	Effect of Particle Packing and Mix Design on Chloride Permeability of Concrete R I A Malek		143
24.	Determination of Consistency of Cement Paste - A Fresh Look S G Shashiprakash, T S Nagaraj and B K Raghu Prasad		150
25.	The Development of Standards for Cements P J Jackson and J M Lawton	•••	157 .8
SPEC	CIFIC THEME IV-B: Cement-aggregate Compatibility and Structure Property Relationship Including Modelling	5	
26	Influence of Intermilling Silica Fume and Bhyolite in Icelandic Cement on		167
08	Alkali Silica Reaction Gudmundur Gudmundsson and Jon S Möller		.01
27.	The Alkali-Silicate Reaction in some Brazilian Dams V A Zampieri, Y Kihara and L Scandiuzzi		174
28.	Correlation of Concrete Strength with Cement Activity and Physico-mechanical Characteristics of Coarse Aggregate I A Sulkowsky and A G Milrud		181
29.	Microstructure of Interfacial Zones Between Hardened Sulfoaluminate Cement Paste and Aggregate Wang Yanmou, Li Shaozheng, Lu Yonghua and Su Muzhen		184
30.	Relationships Between Mechanical Properties of Mortars and the Hydraulic Radius of their Pores S P Jiang, Ch Detriche and J Grandet	••	191
98 31.	Correlation Between Fly Ash Effects on Permeability and Sulfate Resistance of Concrete Parviz Soroushian and Abdulrahman Alhozaimy	••	196

32.	Modelling and Verifying Portland Cement Concrete Strength - Time	203
33	Relationship of Concrete Strength Development with Age	210
00.	I A Sulkovsky and A G Milrud	
34.	A Mathematical Model for Blended Cement G Tognon and S Cangiano	213
35.	Mathematical Modelling of the Kinetics of Binder Hardening and its	220

53.	Mechanism of Deterioration of Gypsum-cement Binder Materials	335
54.	Cement Type Influence on Properties and Durability of Mortars Prepared with Water	342
	and Sea Water in Sea Agression Conditions Bogomil D Daraktchiev	
55.	Investigation into Delayed Ettringite Formation in Concrete J Stark, K Bollmann and K Seyfarth	348
56.	The Resistance of PFA Concrete to Acid Groundwaters	355
57.	Studies on the Carbonation of Hydrated Cement and Its Effect on Microstructure	363
58.	Carbonation of Portlandite Single Crystals and Portlandite in Cement Paste J R Johnstone and F P Glasser	370
59.	Effects of Some Additives on Dynamics of Carbonation of Concrete	377
60.	Effects of Air-Pollution on Chemism and Dynamics of Concrete Carbonation	383
61.	Effect of the Carbonation Process on the Concrete Deterioration	389
	by CaCl ₂ Aggression M Collepardi and S Monosi	44
62	Aggressivity of Phenol Homologues Solutions and Caused Corrosion of	396
982.	Cement Composites	45
	C B Yang X L Wu and S Y Huang	
63.	Corrosion of Hardened Cement Pastes by Formic Acid Solutions A Bajza	402
64.	Electrochemical Degradation of Cementitious Materials	409
SRS.	A Gerdes and \overline{F} H Wittmann	

65.	An Impact of Thermal-treated Argillaceous Ochre on Properties of Decorative Cement N A Sirajiddinov, Kh L Usmanov and D K Adylov		416
66.	Durability of Concrete on High-Aluminate Portland Cement at Action of the		420
	Vas I Kolomiets, B I Popov and Val I Kolomiets		
67.	Equipment to Measure Thermal Expansion of Cementitious Materials <i>R I A Malek</i>		427
68.	Pore Structure and Transport Parameters of Concretes Containing Blended Cements P Distler, J Kropp and H K Hilsdorf		431
69.	Durability Evaluation of Plain and Blended Cements in Aggressive Media O S Baghabra Al-Amoudi, Rasheeduzzafar, Mohammed Maslehuddin and Sahel N Abduljauwad		438
70.	Performance and Durability of Cement Concrete Using Portland Pozzolana Cement S C Maiti and N K Jain		445
71.	Some Characteristics of a Fifty Year Concrete M A Cincotto and V M John		452
	Wang Yansher, Jiang Yunan, Zhang Guelqing and Me Kuelhang		
SPEC	IFIC THEME IV-D: Special Concrete and Cement Composites		
72.	Constitution of Mortars and Pull-out of Steel Fibres B Marchese and G Marchese		461
73.	Interface and Internal Compatibility in a Copper Fibre Cement Compact Composite P Kittl, G Diaz and V Martinez		468
74.	High-strength and Durable Composites with Non-metalic Reinforcement		474
75.	Composites: Cement and Glass Fibre eteration of Serbina eteration of the terms of	} 	479
76.	FRC Reinforced with Short Polypropylene Fibres Fracture Process J R L Dyczek, M A Petri	i	485
77.	Strengthening & Toughening Mechanisms in Carbon Fiber Reinforced Cements and the N Banthia, J Sheng and M Pigeon		492
78.	Structure/Performance Characteristics of Aramid Fibres Reinforced MDF Cement R I A Malek and M N Salama		499
79.	Physical, Chemical and Mechanical Characterization of Geopolymers A Palomo, A Macias, M T Blanco and F Puertas		505
.08 621	Strength Properties of Epoxy-modified Mortars without Hardener Y Ohama, K Demura and T Endo		512
81.	Several Aspects Concerning Modification of Cement Compositions by Polymer Agents L J Lavrega		517

82.	Effects of Addition of Different Quantities of Polymer Dispersions on Hydration Portland Cement and Characteristics of Mortar <i>B Skenderovic</i>	An Impact of Th <mark>l</mark> e N A Scajiddir		525
83.	The Applications of Polymer Concrete Based on Methylmethacrylate for the Machine Tool Industry <i>Peter J Koblischek</i>	Durability of Cont Sign-Vititable Ten Vas I Kolomi		531
84.	Influence of Some Water Soluble Polymers on the Mechanical Properties of Cement Polymer Composites	Equipment to Melek		538
	Kamala Gopinathan and D V Ramana Rao	Pore Structure an		3,89
85.	Increasing Water-Resistance of Phosphogypsum by Polymer Admixtures M V Chumak and O S Popova	P Distin, VK		544
86.	Improving Ductility of Concrete by Incorporating Natural Rubber Latex B Kameswara Rao, K T Sundara Raja Iyengar and T S Nagaraj	O S Baghabi and Sahel N		550
87.	Experimental Investigation of Fracture Properties of Ordinary Concrete and Polymer Cement Concrete	Performance and S C Mailt and		557
	Wang Xinyou, Chen Gaixin and Wu Keru			3.965
88.	The Composition, Properties and Application of Compound Expansive Agent Wang Yanshen, Jiang Yunan, Zhang Gueiqing and Ma Kueihong	M A Cincotto		564
89.	Properties of UEA Shrinkage-compensating Concrete and Its Application in Engineering for Asian Games	FIC THEME IV-D:	101	571
461	You Baokun, Wu Wanchun, Yu Faming, Han Lilin and Chen Fuyin	Constitution of M		
90.	Effectiveness of Expansive Additives in Avoiding Early Age Thermal Cracking L Ebensperger and R Springenschmid	B Marchese Interface and Inte		578
91.	FaL-G: The Lucid Concrete Media P Veerabhadra Rao, N Kalidas and N Bhanumathidas	High-strength an		585
92.	Strengthening Effect of Dehydrated Phases of Calcium Silicate Hydrate on Cement Concrete	Composites: Cen		589
	Feng Naiqian and Ji Xihuang			
93.	Preparation of Novel Porous Materials from Fly Ash, Gypsum and Portlandite by means of Steam Curing-utilization of Limestone Slime and Measurement of Physical Properties of Fired Bodies	FRC Reinforced J R L Dyczel		596
	K Ikeda and C Tashiro			
94.	Improved Formulations with High Early Strength and Regulated Set M M Ali, S K Handoo, N K Jain and S C Ahluwalia	N Banthia, J		602
95.	Durability of High Strength Calcium Sulphate Free Cement	R I A Malek		608
96. Sta	Volume Stability of High Magnesia Cements K M Sharma, R Bhargava, S C Ahluwalia and K C Narang	A Palomo, A		614
97	Study of High-strength Blended Ferro-aluminate Cement Mortar and Concrete	Y Ohama, K		621
Sta	Wang Yanmou, Zhang Liang, Su Muzhen and Deng Junan	Caused A coords		
98.	The Hydrate Character and Durability of Gangue Cement	- EDEANET P T Several P T		628

99.	Durability of Cement Materials Modified with Melted Sulphur D A Ugincius, K I Mokritsky and L I Degteriova			635
100.	Development of Durability-improving Admixtures for Concrete Y Ohama, K Demura, K Tachibana, T Endo and Y Sato			641
101.	Structure Formation of Cementless Concrete made with Slag Sand and High-Calcium Ash from Thermal Power Plants S I Pavlenko and A B Oreshkin			647
102.	Activated Mixed Binders and Concretes Based Upon Them L A Kuznetsova, V M Dymsky, G A Korableva and T N Kobystcha			653
103.	Use of Circulating Sand Activators in Separate Mixing Technology of Concrete B V Gusev, A G Milrud, A E Lutin, I A Sulkowsky and B B Akhmedov	 eme	 IV	658
104.	Advances in use of Sea Water for Preparing of Concrete Mixtures for Reinforced Concrete by Means of a Special Water Treatment <i>B D Darakchiev and L V Pantofchieva</i>			661
105.	New Technique to Examine Homogeneity of Particle Dispersion in Slag/Cement Blend and its Effect on Concrete Durability	speci	s	668

CONTENTS

Volume VI

SPEC	IAL PANEL DISCUSSION I : Computerisation in Cement Science and Concrete Systems		
1.	Computer-Based Models of the Microstructure and Properties of Ceme Materials	nt-Based	3
	E J Garboczi and D P Bentz	Contribution of ²⁹ SL	
2.	Computer Modelling of Microstructure of Cement-Based Materials R T Coverdale and H M Jennings	H zabreni H zabreni i	16
3.	Numerical Simulation of Hydration and Structural Development of Ceme Materials	nt-Based	22
	K van Breugel		
4.	Time-Dependent Temperature Distribution in an Heterogeneous Material H Sadouki and F Wittmann	Temperatures and P G V M Teodoru	28
SPEC	IAL PANEL DISCUSSION II : Resource Economy in Cement and Concrete Making		
5.	Resource Economy in the Production of Cement R Bastier, J Cantacuzene and J P Schaer	X-Pay Diffractometil) G Goswant and	39
6.	Integral Lamination : An Energy-Saving Factor Ph Martin	Influence at Various Shigemi Sakoda	46
7.	The Use of Pozzolanic Materials as an Additive to Clinker : Experience of a M Cement Plant Y Ennadifi	Noroccan	66
8.	Resource Economy in Concrete Making F Howthorn and P Jaugey	Evaluation of Cemer Microscopy L H Rao, P K AJ	73
SPEC	AL PANEL DISCUSSION III : Cement in Hazardous Waste Management		
9.	The Use of Waste Fuels in the Cement Industry Ferenc D Tamás	V K Klacsan, LL	77
10.	Cementitious Materials in Nuclear Waste Management Della M Roy	Phase of Cenetit herbart Poelima	88
11.	Application of Cements to the Treatment and Conditioning of Toxic Wastes F P Glasser	Additiona Method in / Potecholitatry EK Gromozova	114
12.	Hazardous Waste (Organic, Heavy Metal) : Cement Disposal Michael W Grutzeck	Methods of P erformin R I A Malek	119

	13.	Storage Systems for Hazardous Waste : Evolution and State-of-the-Art	126
	14.	Cement in Waste Management : Use of Non-conventional Materials in the Cement Industry J Beretka	132 0398
F	POSTE	Computer-Bussed Models of the Mildure Submit is perfect of Cemeral Materials	
	15	Contribution of ²⁹ Si High-Resolution NMR to the Study of Concrete Alkali-Aggregates	141
		L Fernandez, H Zanni-Théveneau, R Couty, P Barret and D Bertrandie	
	16.	Progress in the ²⁷ AL MAS NMR Spectroscopy : Monitoring the Hydration of Calcium Aluminate Cements D Müller, A Rettel, W Gessner, J P Bayoux and A Capmas	148
	17. SS	Development of Instrumentation and Techniques to Study Cement Suspensions at High Temperatures and Pressures (Up to CA. 200°C) <i>G V M Teodoru, H Hartmann and P Jackmuth</i>	155
	18.	On Line Bulk Analysis of Raw Material in Cement Plant by Neutron Irradiation and Capture Gamma Ray J P Baron, J Alexandre, L Debray and X Dupont-Wavrin	162
	19.	X-Ray Diffractometry in Prediction of Cement Strength G Goswami and J D Panda	168
	20.	Influence of Various Cement Types on Concrete Durability in Marine Environment	175
	21.	An Approach to the Prediction of Portland Clinker Grindability and Strength by Microscopy Yushiro Kihara, Sergio L Centurione and Flavio Andre da Cunha Munhoz	182
	22.	Evaluation of Cement Clinker for Estimation of Compressive Strength by Optical Microscopy L H Rao, P K Akhouri and S K Sinha	189
	23.	Mössbauer Spectroscopy Used for Determining Composition of Calcium Aluminoferrites I Man JA in Portland Clinker	194
		V K Klassen, I I Miroshnichenko, S F Mindolin and V I Belyaeva	
	24.	Carboxylic Acid Anions : The Reaction Mechanisms and Products with the Aluminate	198
		Herbert Poelimann	
	25.	Additions Method in Analysis of Cement Materials by Ion-Selective Electrode	205
	26.	Methods of Performing Adiabatic and Isothermal Calorimetry	210

27.	Dielectric Study of the Hydration Process in Portland Cement A Anagnostopoulou-Konsta and D Daoukaki-Diamanti			216
28.	Portland Composite Cements with Regulated Alkali-Buffer Behaviour Roland Herr, Wolfgang Wieker and Cornelia Hübert		•••	223
29.	The Hydration of Pozzolanic Cement on the Base of Fired Clay Bricks Jonjaua Ranogajec and Ljiljana Fišang	è	•••	233
30.	Study of Pozzolanic Activity in Opaline Rocks Using Particle Size Variations M Frias, M I Sanchez De Rojas, M P Luxan and N Garcia	•••	•••	240
31.	Water Sorption and Weight Change on Heating of a Portland Cement Depending on	•••		247
÷ *	E T Stepkowska, J M Bijen, J L Perez-Rodriguez and A Justo		100	
32.	Alkali Aggregate Reaction : Proposals for a Kinetic Test on Aggregates D Sorrentino, J Y Clément and S Sabio			254
33.	Self-Desiccation in Concrete	 0.c		261
34.	Mechanical Behaviour of Advanced Cementitious Materials W Jiang and D M Roy	<u>in</u> y s	<u>10</u> 44	268
35.	Development of Remote Sensing Technique for Prediction of Limestone Quality M Imran, D K Panda and G V K Prasad			275
36.	The Hydration Chemistry of some Blended Cements Hans S Pietersen and Jan M Bijen			281
	Sera - scanning electron microsobpe			

International Congress on the Chemistry of Cement New Delhi, India, 1992

ADDRESSES AT PLENARY SESSIONS AND SPECIAL LECTURES

Verein Deutscher Zementwerke e.V. Informationssteile Tannenstraße 2, 40476 Düsseldorf Postfach 30 10 63, 40410 Düsseldorf

0 4. Feb. 2003

CONTENTS Volume VII

PRE	FACE			iii
INA	UGURAL SESSION and the base of the second of the base of the particular second of the			
1.	Welcome Address Shri N Srinivasan, Chairman NCB and Chairman, Organising Committee, 9th ICCC			3
2.	The Congress Perspective Dr A K Mullick, Director General NCB and Chairman, International Scientific Committee, 9th ICCC			5
3.	Presidential Address Shri Suresh Kumar, Secretary to the Govt of India, Dept of Industrial Development			8
4.	Inaugural Address Smt Krishna Sahi, Hon'ble Minister of State, Industrial Development	,		10
5.	Vote of Thanks Dr C Rajkumar, Organising Secretary, 9th ICCC			12
CON	ICLUDING SESSION			
6.	The Congress Overview Shri N Biswas, Secretary to the Govt of India and Director General, Technical Development			15
7.	Valedictory Address Shri P R Kumaramangalam, Hon'ble Minister of State, Science and Technology			17
8.	Summing up and Closing Dr A K Mullick, Director General, NCB and Chairman, International Scientific Committee, 9th ICCC	,		19
SPE	CIAL LECTURES			
I.	Present Problem in Cement Manufacturing Prof Dr Eng Hiroshi Uchikawa, Executive Director, Research and Development, Onoda Cement Co Ltd, Japan			23
11.	Advances in Portland Cements and Utilisation of Industrial Wastes Towards Sustainable Development Dr A K Mullick, Director General NCB			58
ADD	ENDA			
1	Energy-Saving Belite-Pozzolanic Cement A Garbacik and S Peukert, Research Institure for Mineral Building Materials, Cracow, Poland			83
2	Production Performances and Utilisation of a Special Superplasticized Cement V Alunno Rossetti, Sapienza University, Engineering Faculty, and F Curcio & L Gussino, Unicem Spa, Guidonia Research Centre, Rome, Italy		·	88
CON	IGRESS ALBUM
